WORK AND LEADERSHIP EXPERIENCE

Charles Schwab - Associate Software Engineer; Denver, CO

September 2023 - Present

- Modernized enterprise CI/CD by engineering production-grade, reusable deployment pipelines in GitHub Actions and Harness for Cloud Foundry, Linux, and Windows, improving reliability and standardization across Schwab
- Recognized as Schwab Technology Services All-Star Developer 2025 and NERDathon winner for delivering enterprise CI/CD platform capabilities and creating "SchwApp," an internal mobile platform to foster employee engagement and community, while mentoring engineers through the NERD Program
- Delivered high-priority initiatives to enable GCP Cloud Run and GCP GKE as new CD targets, extending the enterprise CD platform to cloud-native workloads and accelerating GCP adoption across the organization
- Strengthened security and compliance by integrating CodeQL, Veracode, and SAST automation and enforcing artifact certification in enterprise production workflows, preventing vulnerable or unauthorized releases
- Increased deployment stability by fixing critical rollback logic, refactoring metadata cleanup, and improving manifest handling in shared CD workflows, reducing failed deployments and risk of data loss for consuming teams
- Optimized developer productivity and costs by building a GitHub Copilot license automation tool that reclaims inactive licenses and improves enterprise-wide license utilization
- Expanded multi-OS deployment capabilities by designing Windows and Linux CD frameworks with unified artifact handling, configuration management, and log propagation to GitHub Actions for faster troubleshooting across platforms
- Accelerated developer onboarding and self-service by creating extensive CI/CD documentation (standards, patterns, and platform guides) and resolving support tickets to unblock teams using the enterprise pipelines

STIR Lab - Full Stack Developer; Orlando, FL

May 2022 - December 2022

- Led a team of developers as Project Manager and Full-Stack Developer to improve, launch, and maintain 'SafeLINC', a multi-platform, mission-critical mobile app to help patients and therapists by providing a new digital alternative to 'Safety Plans'
- Reduced monthly AWS expenses by 33% by removing unutilized resources that were incurring costs and updated serverless services to improve scalability
- Developed a real-time messaging feature for iOS and Android with AWS AppSync GraphQL subscriptions and AWS Aurora SQL clusters
- Implemented graphs on the iOS platform with SwiftUI to transform user data into informative visualizations and time-range selections

PROJECTS

Cove: Mock Curated Marketplace - Swift iOS, Firebase, GCP ([Link to GitHub](#))

Spring 2023 - Present

- Built a native iOS app leveraging Swift, Firebase, and GCP to explore mobile development, CI/CD, and scalable architecture
- Integrated Firebase Auth, Firestore, and Cloud Storage to support secure user data and media management
- Followed Apple's Human Interface Guidelines to create a clean, performant, and effective user interface
- Boosted performance and memory efficiency by caching and processing images with Kingfisher

Letics: Workout Logger - React Native, Expo, Node.js, Express.js, MongoDB, and Firebase Auth

Fall 2021

- Led a small team of developers as Project Manager and Full-stack Developer to create a cross-platform mobile CRUD application within a 4 month timeframe
- Ensured data integrity through extensive form validation on the front-end with Formik
- Improved protection of user data by incorporating a SOCKS5 proxy between Heroku server and MongoDB clusters

EDUCATION

University of Central Florida

Bachelor of Science, Computer Science

Spring 2023

SKILLS

Technologies

GitHub Actions, Harness, Google Cloud Platform, Kubernetes, JavaScript, Node.js, Swift, SwiftUI, Firebase, Python, Docker, TensorFlow, Java, React Native, MongoDB, SQL, Jira, AWS, Figma

Certifications

Google Cloud Platform: Associate Cloud Engineer
Scrum.org: Professional Scrum Developer I

August 2022
March 2024
